SQL PROJECT ON PIZZA SALES

AGENDA

1- Retrieve the total number of orders placed.

2-Calculate the total revenue generated from pizza sales.

3-Identify the highest-priced pizza.

4-Identify the most common pizza size ordered.

5- List the top 5 most ordered pizza types along with their qualities

6-Join the necessary tables to find the total quantity of each pizza category ordered.

7-Determine the distribution of orders by hour of the day.

8-Join relevant tables to find the category-wise distribution of pizzas.

9-Group the orders by date and calculate the average number of pizzas ordered per day.

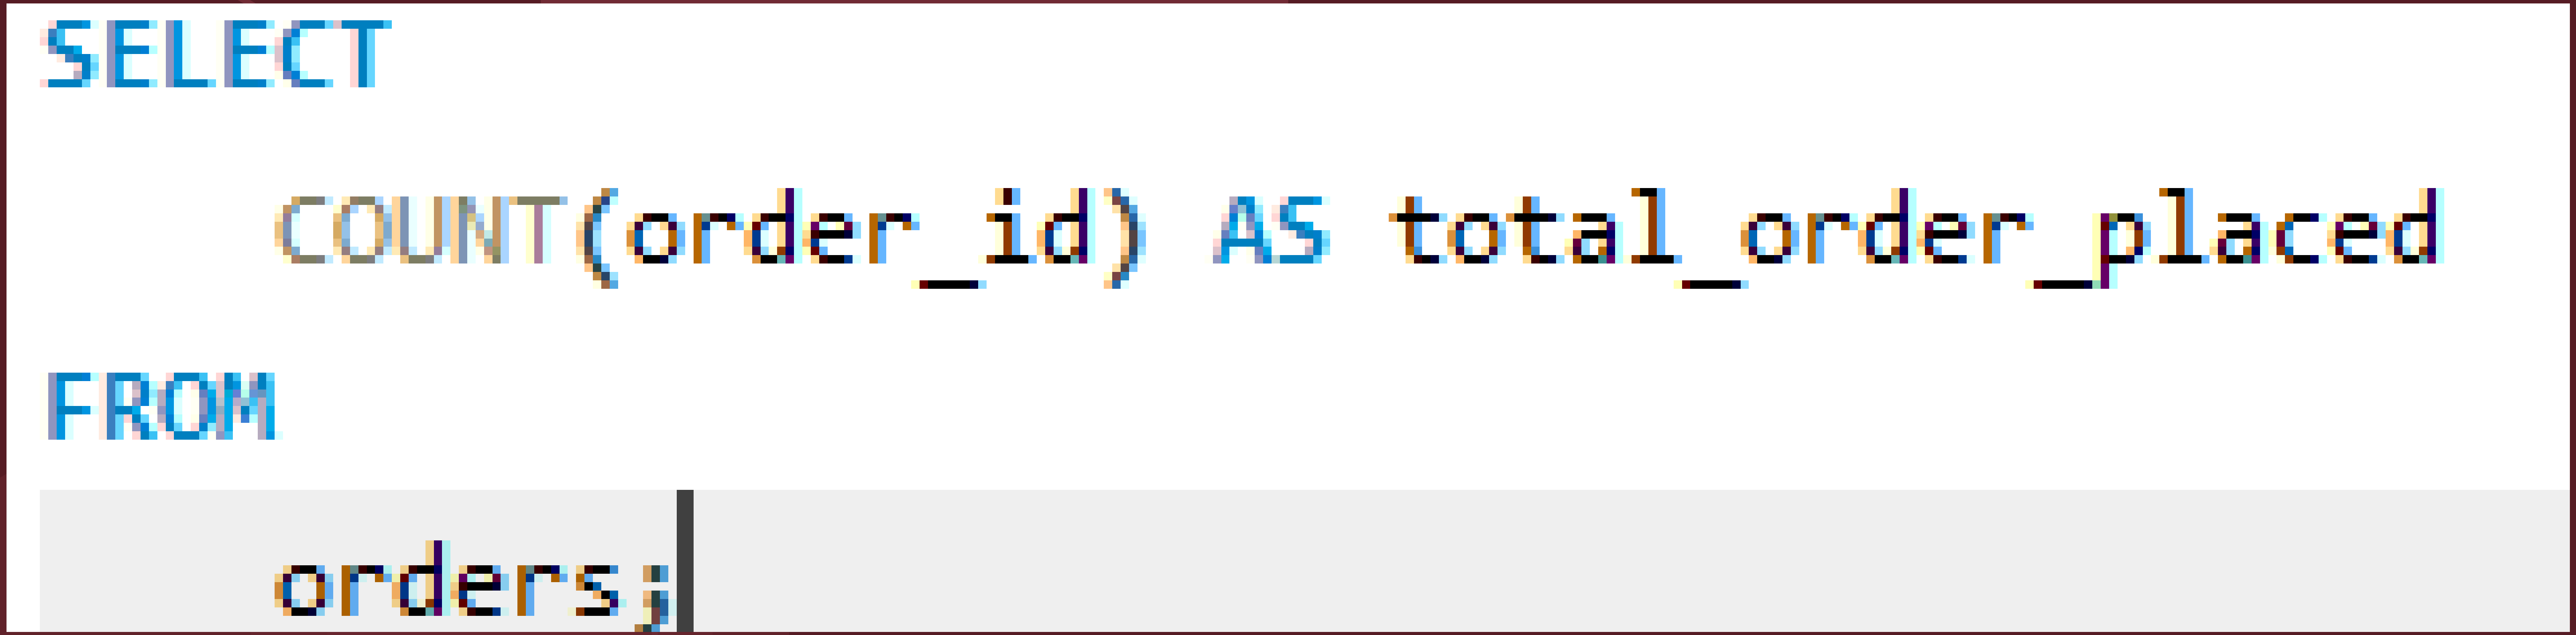
10-Determine the top 3 most ordered pizza types based on revenue.

11-Calculate the percentage contribution of each pizza type to total revenue.

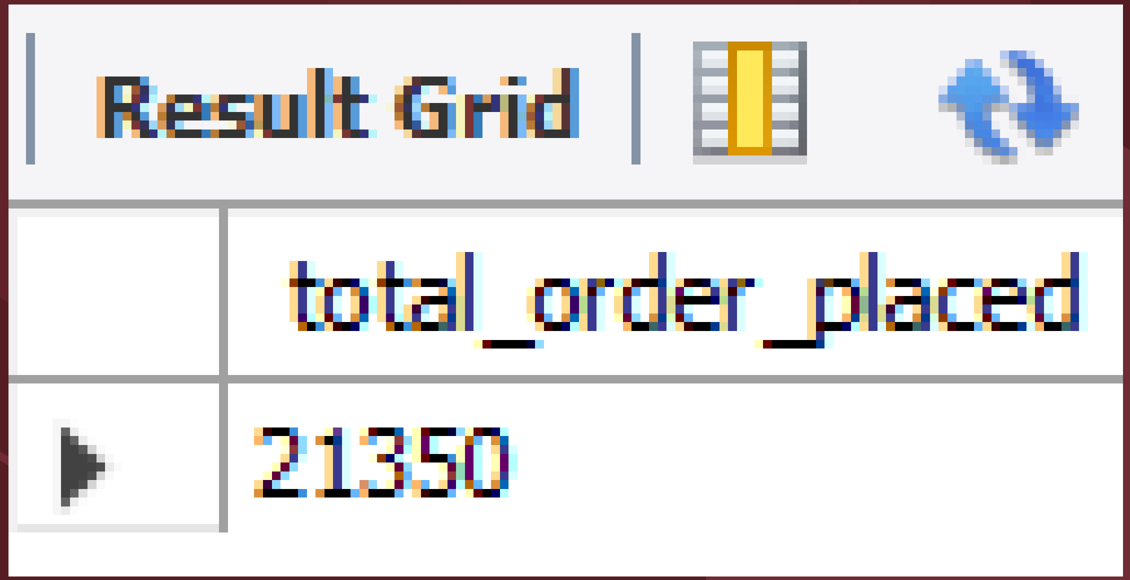
12-Analyze the cumulative revenue generated over time.

13-Determine the top 3 most ordered pizza types based on revenue for each pizza category.

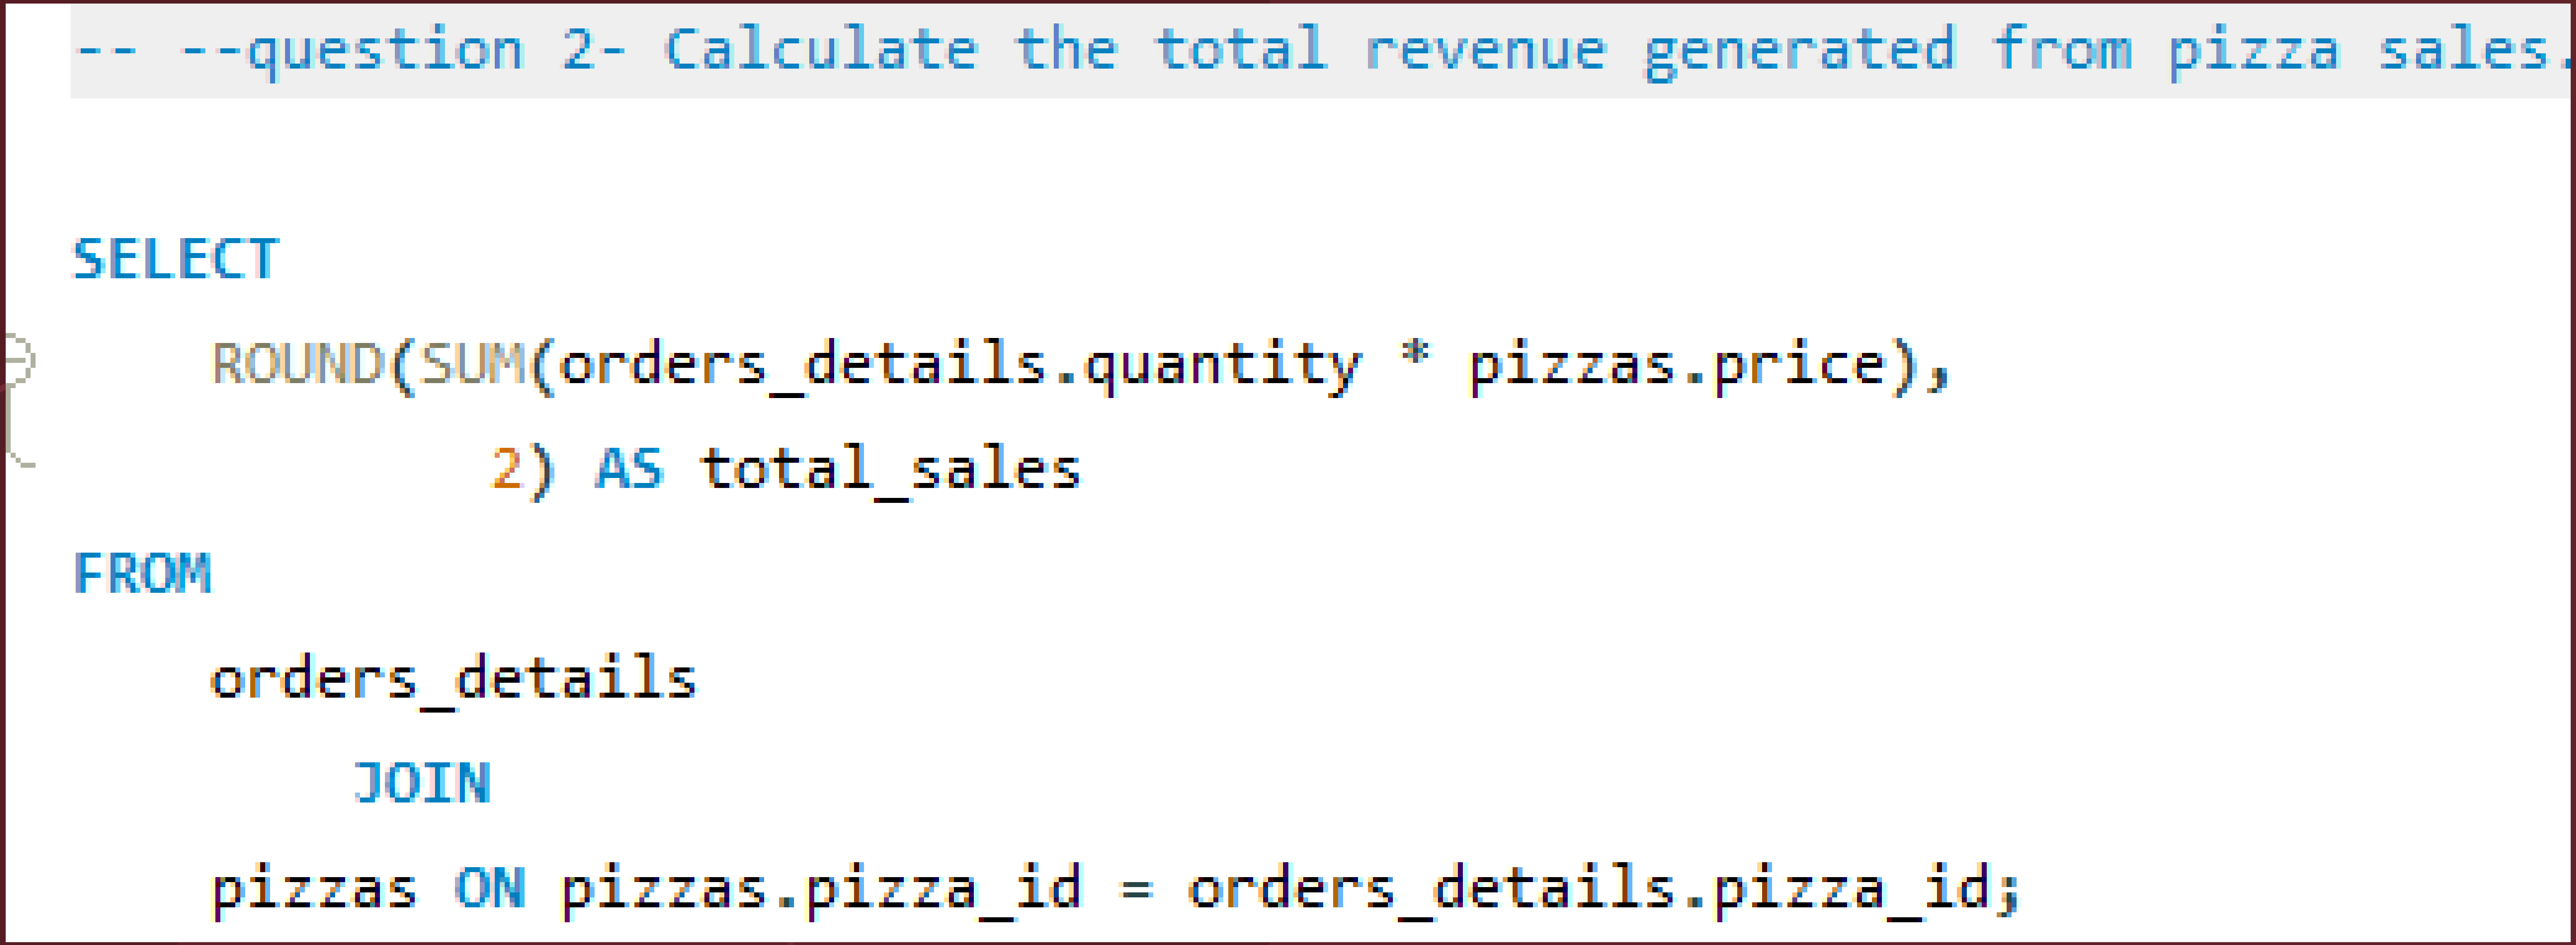
Retrieve the total number of orders placed.



```sql
SELECT
    COUNT(order_id) AS total_order_placed
FROM
    orders;
```

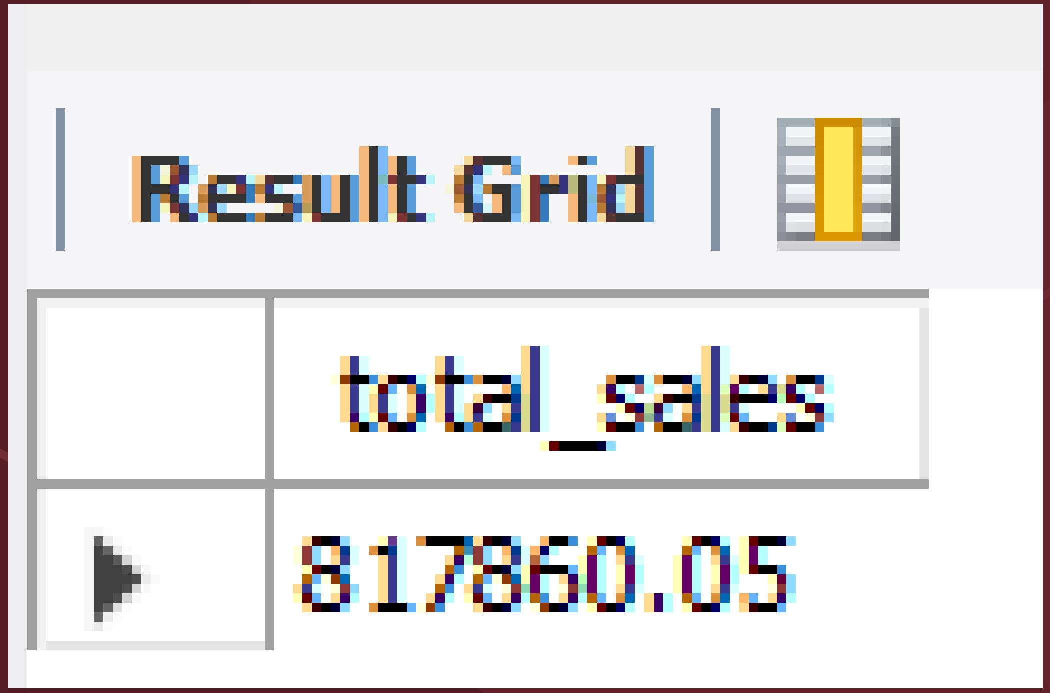


total_order_placed
21350



```sql
-- --question 2- Calculate the total revenue generated from pizza sales.

SELECT
    ROUND(SUM(orders_details.quantity * pizzas.price),
            2) AS total_sales
FROM
    orders_details
        JOIN
    pizzas ON pizzas.pizza_id = orders_details.pizza_id;
```



Result Grid

	total_sales
▶	817860.05
